POINTERS ON SCIENTIFIC HORSE HANDICAPPING

Nothing in racing has changed more heat. That's the theory of it. That it of late years than handicapping. Ten does not always work out that way is one of the "glorious uncertainties of them." today it is an intrinse of the "glorious uncertainties of them." thumb," today it is an intricate sci-

does the work, but when the punter does it, it means finding out what slips the official has unwittingly made, and benefiting by them. He makes slips because his work is done anywhere from a month to twenty-four hours before a race while the nunter has to best horse on performances. fore a race, while the punter has to best horse on performances. the last minute, with all the advantages of track conditions, exercising brought the horses together. The new data, etc., to help him.

tries for a race and avoided gathering any idea of an official estimate. He made a handicap for himself, as if he had been the official, and when it was had been the official, and when it was ment, and a table of percentage is used finished he compared the result with to demonstrate the difference. the official weights, picked out the

horse carrying 120 pounds won from a rally, if ten pounds be taken off, his horse carrying 102 pounds, by half a decimal rises to 118.

The arrangement of the oscillating

very delicate problem, for half a away beyond the record for the dislength is a tenth part of a second over tance, making it impossible to reach six furlongs, and so a rude table in use for nearly a hundred years, was used, which was made to win by a used, which was made to win by a three in 142 and the percentage figure is pounds; a length driving, six pounds; and a length handily, ten pounds, and so on. Thus, driven hard by whip and spur, winning by half a length, four pounds was placed on the 120-pound horse, or four pounds taken off the 102-pound horse would result in a dead sportsman.

The modern method retains all the good points of the old system, but de-It consists in the art of placing a blunt terminal becomes as a needle point. In these matters Americans are when the official handicapper of a club away ahead of the rest of the civilized does the work, but when the punter world. Of that there is no doubt, and

ages of track conditions, exercising brought the norses together. The next ata, etc., to help him.

Ten years ago a man took the encies for a race and avoided gathering post is being reached, while the other is running at the old rate, or even age a handicap for himself, as if he faster, because of greater encourage-

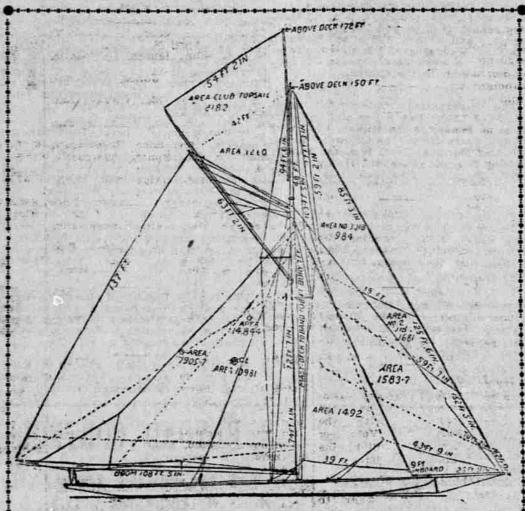

the official weights, picked out the most favored horse, according to his argument, and played it.

Boiled down, this means he took the same distance, carrying 108. If in a race at decimal is possibly 108. If in a race at the same distance, carrying ten pounds more, it will be 98, a point being dehorse carrying 120 pounds won from a rally if ten pounds be taken.

The arrangement of the oscillating point is arbitrary with the calculator, This was a rude method of solving a and is generally placed at a point

neck driving, was equal to three in 1:42, and the percentage figure is pounds; handily by a neck, four 51.78, this being the average number pounds; half a length driving, four of feet covered per second, there being pounds; a length driving, six pounds; seconds, which constitute the 1 minute

for the intercollegiate championship.

A HANDICAPPER

Next Monday evening the Jockey Club meets to receive the programs formulated by the executive committee.

It is anticipated that a hurdle race and a race for polo ponies, to be ridden by their owners, will be included.

The 2:15 class will in all probability be changed to a 2:14 class, as was originally decided upon. With a 2:15 class, Tom Ryder (2:131/2) would be barred, while he would be eligible for the 2:14 class. The enterprise of Tom Ryder's owner in bringing him from Hilo should at least be recognized by giving the old horse chance to enter where he will have

The handicap question still bothers the strong this year and the series will be worthy members of the Jockey Club, who keenly contested. The school has the with one voice exclaim, "And where Aye! Where, indeed, will they find a

however, and her admirers are confident of abuse which will surely descend upon his devoted head should every horse in

Handicapping is the very soul of racing all over the world. Through the This organization has been fortunate in system horses can be brought together signing a strong lot of players-so strong the meeting of which at weight for age would be a farce. The limited racing handicapping system be instituted, else fields numbering more than two are impossible to obtain.

By handicapping the horses, races can be prepared which will draw big crowds on the two last days of the meeting. which have in the past tallen lamentably flat. But no; swayed in their irresoluteness by a man or two who owns a broken down "crack" and is fearful of his in other local sports, that the clubs have steed having to carry five pounds more than an Antidote or a Brock, the Jockey Club pursues its undeviating course to financial ruin and public contumely with giddy alacrity.

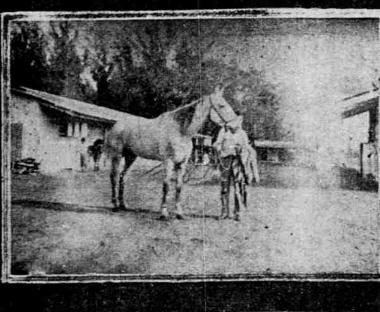

Who with an iota of self-respect wouldhandicap the local equines (?) anyway? It's a question of would not could! Hollinger's unknown crackeriack negotiated a half mile yesterday in :....
